ARJUN SARKAR
Full Stack Web Developer
Bhopal, MP | +91-9131811735 | arjunsarkar8756@gmail.com

SUMMARY

As a dedicated full-stack web developer with a fervent commitment to crafting immersive online experiences, I bring to the table a robust foundation in web technologies. I am actively seeking a challenging position within a distinguished organization where I can continue to augment my expertise, broaden my knowledge, and refine my skills. I am driven by the opportunity to contribute meaningfully to the organization's success while embracing continuous learning and professional growth.

Percentage: 68%

EXPERIENCE

CUSTOM JERSEY   Bhopal
Freelance Project   April 2024
- As a skilled Full Stack Developer, I specialize in building Restful APIs and crafting dynamic e-commerce websites.
- With proficiency in ReactJS for frontend development, NodeJS for backend operations, and MongoDB for efficient database management.

WONDER WORLD   Bhopal
Freelance Project   Nov 2023-Feb 2024(4 months)
- Led development as a Full Stack Developer for the "Wonder World" project
- Utilized the **MERN** (MongoDB, Express.js, ReactJS, Node.js) stack for comprehensive application development.
- Designed and implemented dynamic user interfaces using ReactJS.
- Developed robust backend systems with Node.js and Express.js.
- Ensured seamless integration between frontend and backend components.

TECHVERSE CODING STUDIO   Bhopal
Full Stack Developer Intern (**MERN**)   Aug 2023- Oct 2023(3 months)
- Developed two MERN stack applications: a Library Management System and an Employee Leave Management System.
- Designed and implemented intuitive user interfaces using React.js for seamless user experiences.
- Leveraged Node.js and Express.js to build robust backend systems for handling data storage, retrieval, and processing.
- Utilized MongoDB to establish efficient and scalable databases for storing application data.

KANAK ENTERPRISES   Bhopal
Frontend Developer   Oct 2022 - July 2023(10 months)

- Developed responsive and visually appealing web interfaces using HTML, CSS, and JavaScript.
- Implemented modern CSS techniques such as Flexbox and Grid layout for efficient page layouts.
- Utilized JavaScript to create interactive elements and enhance user experiences on web pages.

PROJECTS

Omegle Video Chat Application   March 2024
- This is a dynamic project built on the **MERN** stack, leveraging React.js for the frontend and Node.js for the backend.
- With WebSocket integration, it enables real-time bidirectional communication between users, facilitating instant messaging and signaling for video calls.
- Utilizing **WebRTC** technology, the application allows seamless peer-to-peer audio and video communication directly within web browsers.

My Pinterest   May 2023
- Led the development of a Pinterest clone project, implementing a feature-rich web application using Node.js and Express.js.
- Utilized the EJS (Embedded JavaScript) template engine for Express to create dynamic and visually appealing views.

Social Fund-Raising   Apr 2023
- Conceptualized and developed a Social Fund-Raising platform, leveraging the power of ReactJS for a dynamic and engaging user interface.
- Designed an intuitive and user-friendly dashboard allowing campaign creators to initiate, manage, and track their fundraising initiatives effectively.
